Hypertec Open Systems Warranty

Many structured cabling projects require a systems warranty and until now only certified installers of the major cabling system manufacturers could offer these. Now any ACMA registered cabler can offer an economical "mix and match" system backed up by the **Hypertec Standards Based 25 Year Open System Warranty**. In true open systems tradition, any verified cable may be used with the Hypertec range of UL verified jacks and patch panels. The Hypertec warranty program doesn't have any onerous pre-requirements such as certified installer agreements or compulsory training courses that are a feature of other programs.

What is the Hypertec Open System Warranty?

Hypertec's Open System Warranty is a full replacement, 25-year, standards based warranty covering components, link performance and applications support.

The warranty can be offered for any size of project by any ACMA registered cabler for links comprising solely with the Hypertec range of Category 6A jacks and patch panels and any manufacturers verified Category 6A/Class EA cable.

Who is Hypertec?

Legend Performance Technology (LPT) serves IT, Specialist data, Audio Visual, Security, POS, Education, Corporate computing and Broadcast markets.

Legend Performance Technology supplies a wide range of proven memory, data racks & cabinets, UPS, special cables, data rack environment management products including a wide range of IT products for Data rooms including PDU's and Patch Panels for system integrators, network hardware and cabling, tools and accessories.

Legend Performance Technology also offers Copper and Fibre made to order cables.

Clients are served by account managers and a national team of business development specialists supported by a team of product specialists and a national network of warehouses to deliver same day order service.

Legend Performance Technology offers advanced on line webshop facilities to all of its clients 24/7 including latest specials and delivery tracing.

What is Hypertec's commitment under the warranty program?

In the event of a valid claim by the end-user Legend Performance Technology (who owns Hypertec brand) will provide replacement products to the cabler and pay the reasonable costs of their re installation on the following provisos:

- The cable used in the link is compliant with the Category 6A requirements of the edition of AS/NZS 3080 current at the effective date of the warranty.
- The declaration made by the cabler on the warranty application form was true.

What are the link test requirements?

To be eligible for the warranty all links must be tested as follows:

- One of the following AS/NZS IEC 61935.1 compliant Level IIIe or higher cabling testers must be used:
 - Any Lantek II - 500
 - Any Fluke DTX - 1800 or DSX-5000
- The permanent link test configuration must be used.
- For any of the above Fluke testers Category 6A/Class EA permanent link adapters must be used.
- The latest version of the cable tester's software/ firmware and Standards must be used.
- The ISO/IEC 11801 Class EA permanent link test limits that are current on the test date must be used.
- All links must be tested using the default AUTOTEST function.

What is the warranty application process?

On completion of link testing the cabler must complete the warranty application form on the back of this brochure and forward it to LPT. The test results should not be sent to LPT but the cabler must keep them for the duration of the warranty period.

LPT will send a warranty certificate for the project and a warranty statement detailing Legend's commitment to the cabler within 30 days of receiving a correctly completed warranty application form.

HYPERTEC CAT6A WARRANTY APPLICATION

Cabler's company name: _____

Address: _____

Authorised warranty signatory name: _____

Position: _____

Telephone: _____

Facsimile: _____

Email: _____

End-User company name: _____

Project site address: _____

Completion date: _____ Number of Outlets: _____
